Technical Skills

Languages: JavaScript, TypeScript, Python, C++, HTML, CSS
Frontend: React.js, Next.js, Tailwind CSS, Vite, Framer Motion
Backend: Node.js, Express.js, REST API Design, Authentication & Authorization, JWT
Databases: MongoDB, Firebase
Cloud & Deployment: Vercel, Cloudinary
Tools & Integrations: Git, GitHub, Postman, VS Code
Core Concepts: Responsive Design, API Integration, State Management, Data Structures & Algorithms

Experience

Data Science & Development Intern Jan 2024 – May 2024
Personifywy Remote
– Collaborated with the software team to deliver production-ready machine learning solutions adhering to clean code practices.
– Built and optimized robust data processing pipelines and feature engineering workflows using Python.
– Developed text classification models and performed extensive data analysis to identify patterns and enhance performance.

Projects

Desktop Style Portfolio | Live | Repository | *React.js, Vite, Tailwind CSS, Framer Motion* 2026
– Developed a Windows-inspired interactive desktop environment with draggable, resizable application windows.
– Implemented smooth animations and complex UI interactions using Framer Motion to optimize visual performance.
– Integrated GitHub and weather APIs to dynamically render live activity and data into the frontend interface.
– Built custom state management for seamless window utilities and responsive layout handling across devices.
AI Refund Agent (Preview) | Live | Repository | *Next.js, TypeScript, Groq AI, Tailwind CSS* 2026
– Developed an AI-powered customer service agent using Next.js and Groq AI for intelligent query understanding.
– Created a rule-based decision engine with Zustand state management to accurately validate refund eligibility.
– Built multi-step dynamic workflows to intelligently route customer queries based on configurable business logic.
Thumbmax | Live | Repository | *Node.js, Express.js, Gemini API, Cloudinary* 2025
– Developed a full-stack media platform leveraging Node.js, Express.js, and the Gemini API for thumbnail generation.
– Integrated Cloudinary for optimized image processing, scalable storage, and secure media delivery.
– Implemented JWT authentication for secure APIs, including request validation and rate limiting on Vercel.

Education

Madhav Institute of Technology and Science 2020 – 2024
Bachelor of Technology in Electronics and Telecommunication Engineering Gwalior, Madhya Pradesh
– CGPA: 8.49 / 10.0
